Device Readiness & Student Practice Exercise

This exercise has been created to make sure you and your students are prepared on test day. The following tasks should be completed prior to the actual test day. While you don't have to complete everything in this plan, it is important to at least perform the device readiness check prior to test day.

Objectives

- · Provide students an orientation to the test
- Confirm that student devices meet testing requirements
- · Ensure that students know how to log in
- Allow an opportunity for students to practice taking a few test questions

Approximate Length

1 hour

Steps

1. Watch introduction video

- 2. Device readiness-check student workstations
- 3. Practice logging in
- 4. Try a practice test

Proctor Preparation

If practicing the login steps, have a test session prepared:

- · Create a test session
- · Populate students into the session
- · Assign a test to students

Test Session Creation and Student Log In Steps

Students Will Need

- · Device they plan to use for testing
- NWEA Secure Testing app (K-2 using an iPad)
- Headphones (K-2 or using Text-to-Speech)

Step 1: Watch the Introduction Video for MAP Growth

Open a browser and go to: studentresources.nwea.org

Next, select the appropriate grade level for your students, and then choose "What's This Test About?"

Tip: Videos are available with Spanish captions when selecting the CC symbol on the video player.

(i)

Step 2: Device Readiness—Check Student Workstations

Either follow the directions in this exercise or have students complete the **Device Readiness Check** [2]. Below fourth grade, we recommend that a parent/caregiver assist with the exercise.

- 1. Direct students to open a browser and go to: check.nwea.org
 After a few seconds, students should see the banner at the top change from "Loading... Please wait" to either a green checkmark for pass or a red "X" for fail.

 Image: This machine has passed the check. TETAGAN
 Devices that pass this check are much less likely to encounter issues that may disrupt testing. We recommend running this check on several workstations, in each testing lab, prior to your first.
 Any failures should be fixed. Refer to the System Requirements for testing. For additional help, please contact Partner Support [2].
- 2. Once student devices have passed, tell students to go to: test.mapnwea.org

Students should see the login page.	tion error: Ctrl+Shift+0, then re	efresh browser.

 Verify that students see the login page. Once they do, their devices have met the minimum requirements for testing.

Step 3: Practice Logging In

- 1. Log in at teach.mapnwea.org 🛃 and open your test session, which will take you to the proctor console.
- 2. Tell students to go to the login page, test.mapnwea.org
- **3.** Ask students to type in the session name and password. In the image below, the session name is "HelloHello", and the password is "4140".

Step 4: Try a Practice Test

The practice test has only a few questions and will not be scored. It provides an opportunity for students to become familiar with the test question format.

1.	Ask students to open a browser and go to: practice.	mapnwea.org 🔼
2.	Tell students to type in:	
	Username: grow Password: grow	
	nwea	
	Fractice Test / Item Sampler Log in	Practice Test / Item Sampler Log in
	Username Nueders de usaeto grow Password Correction grow	Username Nombre de usuario grow Password contraseña grow
		¢

3. Have students select grade, subject, test language, and test from the drop-down menu.

	Select a practice test		2	-
(a)	2	· ·	Math	· ·
Cis	Math	•
